

PUBLIC CONSULTATION PAPER NO. 1/2018

THE IMPLEMENTATION OF DATA BREACH NOTIFICATION

The Public Consultation Paper (PCP) No. 1/2018 entitled The Implementation of Data Breach Notification is intended to solicit feedback from data users and/or relevant parties pertaining to personal data breach management.

Personal data breach has become a global threat. Therefore, in light of this, the Personal Data Protection Commissioner (Commissioner) is going to implement Data Breach Notification (DBN), which is currently having practised worldwide.

Objectives:

The implementation of DBN is aimed to assist data users in personal data breach management. Basically, it is a mechanism where data users will give notification, informing the authority and the affected/relevant parties where a breach has occurred in an organization.

The DBN serves as proactive steps taken by data users to contain the damage caused by a breach incident. Data users should be able to demonstrate their commitment and accountability when addressing the breach. In addition, the DBN enables the enforcement authorities/regulators to conduct investigation thoroughly, transparently and fairly.

The DBN is expected to be implemented by end of 2018 by way of imposing conditions to the certificate of registration issued by the Commissioner to the data users. In this regard, the Commissioner welcomes the feedback to this paper and suggestions of other criteria (if any) to be set for the implementation of DBN as stated in the consultation paper.
